

GEO-ACCESS MAPS

For 4th Quarter, 2022

The following Geo-Access maps are generated by the KanCare Managed Care Organizations (MCOs) each quarter and illustrate the geographical coverage of providers throughout the state for specific provider types. The format for the maps has been updated to reflect changes with KanCare 2.0 and in accordance with the Medicaid and CHIP Managed Care Final Rule.

The Geographic Mapping Reports allow KDHE to evaluate the growth of the network, identify gaps in coverage, monitor MCO compliance with the KanCare Network Adequacy Standards, and provide constructive feedback to the MCOs.

The provider categories included in the maps are listed below:

- Adult Primary Care Providers (PCPs)
- Pediatric Primary Care Providers (PCPs)
- OB/GYN
- Adult Behavioral Health (non-waiver)
- Pediatric Behavioral Health (non-waiver)
- Adult Specialists
- Pediatric Specialists
- Hospital
- Pharmacy
- Dental and Vision
- Ancillary Services
- HCBS (fixed-site)

Each map identifies the specialty and—where applicable—population for the service identified. Only providers contracted for the specified service are shown, including providers in border states. Provider service locations are identified on each map as a small dot and colored circles are used to represent the radius in miles from each provider service location (for the identified urban-rural classification). The size of each circle corresponds to distance requirements identified in the network standards.

For each map, a count will display the number of unique providers and locations. In some instances, many providers practice in a single location. Providers may also have multiple practice locations.

The index below identifies the classification indicators used in the maps. For all maps, the following scale is used.
